- React
- Bootstrap
- Cascading Style Sheets (CSS)
- HTML5
- GraphQL
- Apollo GraphQL
- Git

INTERESTS AND HOBBIES

- Reading
- Music
- Movies
- Games
- Drawing

PERSONAL PROFILE

I am a 4th grade computer engineering student at Eskişehir Osmangazi University. I passionate about software development and designing websites. I taught myself about front-end development because of that passion. I learned HTML, CSS, JS and after that I learned VUE and GraphQL to develop more professional apps. I am still teaching myself about front-end engineering and currently I am learning React, React Native and Typescript. I am looking for new things to learn, to be a better engineer.

PROJECTS

Timezone App - github.com/ilkaay/rt-every-timezone
It was my internship project and I had a lot of fun doing it. I have used many components of Vue, besides I used the moment.js package. Thanks to this project, I was accepted to the internship.

Personal Website - github.com/ilkaay/my-website
This is my personal website. I will develop the project.

GraphQL - github.com/ilkaay/graphQL
The project that I learned and practise graphQL.

Food Order App - github.com/ilkaay/food-order-app
The project that I learned and practise React.

EDUCATION

09/2017 – 06/2022 Eskisehir, TURKEY
Computer Engineering | Bachelor
Eskisehir Osmangazi University
